SUMMARY

Creative and passionate full stack software engineer specializing in frontend development. 3+ years experience with image analysis and a deep understanding of how the extraction or blend of meaningful information from images creates an experience for the viewer. A graduate from the University of Washington full stack software development program in 2020. Originally from Rome,Italy, excited to bring a fresh perspective to a collaborative team environment.

TECHNICAL SKILLS

HTML5, CSS, Bootstrap, Bulma, JavaScript, React.js, Redux, JQuery, MySQL, PHP, Node.js, Heroku, Git, CRUD operations, RESTful API's Mongo Db, PWA, and Security.

PROJECTS

YouTutor | https://yoututor2020.herokuapp.com/ | https://github.com/OlgaSadova/YouTutor
https://github.com/OlgaSadova/YouTutorB
A full stack application for getting help with your questions providing tutor service.
- Responsible for the construction of React components and pages but I collaborated on every aspect of the project.
- React-dom, React-router, React-router-dom, Cloudinary-react, React-axios, React-scripts, React-star-rating-component, MySQL, Node MySQL 2, Sequelize, Express,Express-session, Connect Session Store using Sequelize, bcrypt.

Maple Valley | https://protected-lowlands-08660.herokuapp.com/ | https://github.com/coleloui/MapleValley
- An online registration system for volunteers and parents of campers of Girl Scouts Maple Valley Day Camp that will replace paper registration and facilitate camp planning   by allowing registration details to be easily shared with the camp planning committee.
- Mainly dedicated to construction of the DataBase, the routes, and the controllers. Additionally, I created the front end section dedicated to the manager profile.
- Web server and pages: npm express and express-handlebars; Database: npm sequelize, connect-session-sequelize, mysql2 User sessions and Authentication: npm express-session, bcrypt and dotenv; Sending emails: npm nodemailer, CSS styling: bulma.

FINDR | https://commiewalker.github.io/Findr/ | https://github.com/commiewalker/Findr
- FINDR is an application that simply and randomly displays an image from a restaurant in a card that can be cycled through until an appealing option is picked. Once the top choice is chosen, the restaurant information will be shown to get a user to their food as fast as possible.
- Responsible for the implementation of the API calls but I collaborated on every aspect of the project.
- In order to build this app, we used CSS, HTML,Javascript, jQuery, and two APIs to load restaurant data and mapping information. Zomato API: Restaurant information such as location, rating, average price. Google Maps API: Allows for mapping so that users can easily get directions to the POI chosen.

EXPERIENCE

Production Secretary
Project Rwanda Onlus; Rome-Rwanda
Worked on the production of the film "The Country of Women"   Feb 2019 - Aug 2019
